-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 58-083420 (JP '420) in view of Cordova et al. (US 6,276,254). JP '420 discloses a safety helmet comprising an inner and outer layer having an epoxy resin having glass fibers (i.e. fiber reinforced panels). The inner layer is made of three layers of non-woven fabric having resin coated between the layers to make an integral resin immersed non-woven fabric. JP '420 discloses the claimed invention except for the teaching that a net member is located between the first and second nonwoven layers.

Cordova et al. (US 6,276,254) disclose armor systems used in helmets (col 1, ln 56). The armor system comprises first and second layers. The first layer comprises a plurality of networks selected from the group consisting of an uncoated nonwoven network of randomly oriented fibers and an uncoated knitted, preferably tightly network of fibers. The second layer comprises a plurality of networks selected from the group consisting of a loosely woven network of fibers, an open knitted network of fibers, a braided network of fibers, and a nonwoven network of oriented fibers (col 3, ln 33-42). It should be noted that the Examiner is equating Cordova's open knitted

network of fibers to a scrim. The fibers can be thermoplastic (i.e. polyester and polyolefins) and thermosetting (i.e. phenolics and epoxies) col 5, ln 22-25). In another embodiment, the first layer can comprise a plurality of networks selected from the group consisting of an uncoated nonwoven network of randomly oriented fibers and an uncoated, open knitted network of fibers (col 10, ln 48-52). It would have been obvious to one having ordinary skill in the art to have used Cordova's open knitted thermosetting or thermoplastic fibers in between the first and second nonwoven layers of the intermediate layer of JP '420, motivated by the desire to create a helmet having increased strength and puncture resistance.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ula C. Ruddock whose telephone number is 571-272-1481. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
